

KIRTI WANI

Pune, Maharashtra | 7588982040 | kirtiwani24@gmail.com

PROFESSIONAL SUMMARY

BE – Information Technology fresher (2026 Batch, CGPA 9.11/10 up to Sem 7, No Backlogs) with hands-on experience in Java, SQL, JavaScript, and full-stack web development. Built projects spanning relational database design, backend logic, REST API integration, and frontend interfaces. Seeking an entry-level Software Developer, Backend, Full Stack, or Database Developer role.

EDUCATION

Savitribai Phule Pune University – APCER

Bachelor of Engineering – Information Technology CGPA: 9.11/10

Pune, MH

Nov 2022 – May 2026

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript

Web: HTML5, CSS3, Next.js

Databases: MySQL, MS SQL Server, SQLite, Supabase (PostgreSQL) – Joins, Subqueries, Stored Procedures, Triggers, Indexing, Transactions (ACID), Normalisation (3NF), ER Modelling

Backend & APIs: REST API Integration, Java Application Development, OOP (Encapsulation, Inheritance, Abstraction, Polymorphism)

Tools & Platforms: Git, GitHub, VS Code

INTERNSHIPS

CodSoft

Virtual Internship – Java Programming

Remote

Jan – Feb 2025

- Completed a 4-week virtual internship applying core Java and OOP concepts (encapsulation, inheritance, abstraction) through hands-on programming tasks.

AICTE EduSkills – Google for Developers (NEAT, AICTE)

Remote

Virtual Internship – AI/ML Fundamentals

Apr – Jun 2024

- Completed a 10-week virtual internship on AI/ML fundamentals under AICTE's EduSkills program, supported by Google for Developers.

PROJECTS

Personal Finance Manager

MySQL, SQLite, SQL, ER Modelling

- Problem:** Individuals lack a simple, structured way to track income, expenses, and budgets across categories without relying on spreadsheets.
- Solution:** Designed a normalised (3NF) relational database with foreign key constraints and composite indexes; wrote 25+ SQL queries (joins, subqueries, window functions, stored procedures) to generate financial reports and budget dashboards for multiple users.
- Improvement:** Indexing on frequently queried columns cut query execution time by ~40%.

AI-Powered Voice Interview Platform

Next.js, Supabase, REST APIs, LLM

- Problem:** Manual candidate interviews are time-consuming and inconsistent, making early-stage hiring hard to scale.
- Solution:** Built a full-stack platform using Next.js and Supabase; integrated voice AI (Vapi) and LLM APIs to auto-generate interview questions and evaluate candidate responses, with real-time data storage and user authentication.
- Improvement:** Achieved 88.3% evaluation accuracy and a 45% reduction in interview time vs. manual methods, with analytics dashboards for result review.

Library Management System

Java, MySQL, OOP

- Problem:** Small libraries need a reliable way to track book inventory, memberships, and issue/return records without manual registers.
- Solution:** Built a Java application using OOP principles (encapsulation, inheritance, abstraction) with SQL-backed CRUD operations for 500+ records, including availability queries and overdue reports.
- Improvement:** Replaced manual record-keeping with searchable, queryable digital records, reducing lookup and reporting time.

E-Commerce Platform

JavaScript, HTML5, CSS3, MySQL, Git

- Problem:** Small sellers need an affordable, functional online storefront with product listings, cart, and order tracking.
- Solution:** Developed a full-stack shopping website with a responsive HTML5/CSS3 frontend and a normalised MySQL database handling products, cart, and order management, with foreign key relationships across tables.
- Improvement:** Structured schema and version control (Git) enabled clean feature additions without data inconsistency.

CERTIFICATIONS & TRAINING

HackerRank SQL – Advanced · Intermediate · Basic (Verified)

QSpiders Pune (2025): Hands-on training in Core Java (OOP, exception handling, collections), SQL (joins, stored procedures, triggers, indexing, query optimisation, normalisation), HTML5, and CSS3.
