

KIRTI WANI

Pune, Maharashtra | 7588982040 | kirtiwani24@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

BE – Information Technology fresher (2026 Batch, CGPA 9.11/10, No Backlogs) with hands-on experience in Java, Spring Boot, SQL, JavaScript, and full-stack web development. Built production-grade projects spanning distributed systems, cryptography, REST API design, and cloud deployment. Seeking an entry-level Software Developer, Backend, or Full Stack Developer role.

EDUCATION

Savitribai Phule Pune University – APCER

Pune, MH

Bachelor of Engineering – Information Technology CGPA: 9.11/10

2022 – 2026

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript | **Frameworks:** Spring Boot 3.3, Next.js | **Web:** HTML5, CSS3

Databases: MySQL, SQLite, Supabase (PostgreSQL), Joins, Subqueries, Stored Procedures, Triggers, Indexing, Transactions (ACID), Normalisation (3NF)

Backend & APIs: REST API Design, Spring Boot (JPA, Hibernate, Transactions), OOP, MVC Architecture | **Security:** RSA-OAEP, AES-256-GCM

DevOps & Tools: Docker, Git, GitHub, VS Code, IntelliJ IDEA, Postman, Maven, Render

PROJECTS

UPI Offline Mesh – Mesh-Routed Deferred Settlement [GitHub] [Live Demo]

Java, Spring Boot, Docker

- Built Spring Boot backend enabling offline UPI payments via Bluetooth mesh networking; payments encrypted with hybrid RSA + AES-256-GCM, broadcast device-to-device, settled when bridge node reaches internet.
- Achieved exactly-once settlement via atomic compare-and-set on SHA-256 hash; implemented replay attack prevention with 24-hour freshness window + nonce uniqueness; Dockerized and deployed to Render.

AI-Powered Voice Interview Platform [GitHub]

Next.js, Supabase, REST APIs, LLM

- Built full-stack platform with Next.js and Supabase; integrated voice AI (Vapi) and LLM APIs to auto-generate interview questions and evaluate responses with real-time data storage.
- Achieved 88.3% evaluation accuracy and 45% reduction in interview time vs. manual methods, with analytics dashboards for result review.

Personal Finance Manager

MySQL, SQLite, SQL

- Designed normalised (3NF) relational database with foreign key constraints and composite indexes; wrote 25+ SQL queries (joins, subqueries, window functions, stored procedures) for financial reports.
- Indexing on frequently queried columns cut query execution time by ~40%.

INTERNSHIPS

CodSoft

Remote

Java Programming Internship

Jan – Feb 2025

- Applied core Java and OOP concepts through hands-on programming tasks and project development.

AICTE EduSkills – Google for Developers

Remote

AI/ML Virtual Internship

Apr – Jun 2024

- Completed 10-week internship on AI/ML fundamentals under AICTE's EduSkills program supported by Google.

CERTIFICATIONS & TRAINING

HackerRank SQL (Advanced | Intermediate | Basic) – Verified · [Link]

LLM Engineering – Large Language Model development and deployment (2025)

LeetCode Problem Solving – Data Structures & Algorithms practice (Udemy, 2025)

AI-900: Azure AI Fundamentals – Microsoft Azure AI certification (2024)

QSpiders Pune – Core Java, SQL (joins, stored procedures, triggers, indexing), HTML5, CSS3 (2025)

KEY ACHIEVEMENTS

Deployed Production App: Built and deployed Spring Boot application with Docker to Render cloud, demonstrating full DevOps lifecycle.

Cryptographic Security: Implemented hybrid encryption (RSA + AES-GCM) – same scheme as TLS for secure web communication.

Strong Academics: Maintained 9.11/10 CGPA with no backlogs throughout BE program.
